SUMMARY

Aspiring Data Science Engineer with a strong foundation in machine learning, deep learning, data analysis, and statistics. Skilled in building and evaluating predictive models using Python, Pandas, NumPy, Scikit-learn, TensorFlow, and PyTorch. Hands-on experience in NLP, computer vision, and deep learning applications using Hugging Face Transformers and modern AI frameworks. Proficient in data cleaning, preprocessing, feature engineering, and applying machine learning algorithms to solve real-world problems. Seeking an entry-level Data Scientist role to leverage technical and analytical skills in developing impactful AI-driven solutions and supporting data-driven decision-making.

SKILLS

Programming Languages: Python, Django, HTML, CSS, SQL

Libraries: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch

Tools: Jupyter Notebook, Streamlit, Matplotlib, Seaborn, Google Colab, Git, Flask, Excel

Data Analysis Techniques: Exploratory Data Analysis (EDA), Data Cleaning, Data Visualization

Machine Learning: Regression, Classification, Clustering, PCA

Deep Learning: Neural Networks, NLP, Transfer Learning, Hugging Face Transformers, Gen AI

Soft Skills: Analytical Thinking, Communication, Attention to Detail

CERTIFICATIONS

Advanced Program in Data Science - Illinois Institute of Technology, US

Advanced Program in Data Science - Entri, NSDC

- Completed an end-to-end Data Science program, gaining hands-on experience in Machine Learning (Regression, Classification, Clustering, and Ensemble Methods), Deep Learning (ANN, CNN, RNN, LSTM), NLP (Hugging Face), and Generative AI architectures (GANs, Diffusion Models).

PROJECTS

AI-Powered Multimodal Resume Analyzer | Python · TensorFlow · Keras · NLP · Gemini AI · Streamlit

- Architected an end-to-end multimodal deep learning system that accepts PDF uploads or raw text, extracts content using pdfplumber, classifies resumes into 43 job categories using a Bidirectional LSTM with a custom Bahdanau-style Attention Layer, and delivers AI-powered career feedback via Google Gemini 2.5 Flash API
- Engineered a custom Keras Attention Layer using the Layer subclass API with learnable weights registered via `add_weight()`, enabling the model to focus on discriminative resume vocabulary and improving classification accuracy from 47% to 88%+
- Implemented a domain-specific NLP preprocessing pipeline including regex-based text cleaning, NLTK stopword removal, resume-generic word filtering, and category-targeted keyword boosting to resolve 5 systematic category confusion pairs
- Integrated Google Gemini 2.5 Flash Generative AI to produce structured JSON outputs including resume quality scores, skill gap analysis, ATS improvement suggestions, rewritten bullet points, and auto-generated cover letters per predicted job category
- Deployed the full application on Streamlit Cloud with a secure API key management system, retry logic for rate limit handling, and download functionality for generated career documents.
- [Streamlit URL](#) [GitHub](#)

E-Shop Price Predictor | Machine Learning Regression · Flask

- Built a machine learning regression model to predict e-commerce product prices based on product features such as category, brand, ratings, and specifications.
- Performed data preprocessing including handling missing values, encoding categorical variables, and feature scaling.
- Trained and evaluated multiple models (Linear Regression, Decision Tree, Random Forest, Gradient Boosting) and optimized performance using cross-validation.
- Achieved improved prediction accuracy using ensemble method (Random Forest).
- Evaluated model using MAE, RMSE, and R² score to ensure robust performance.

WORK EXPERIENCE

Content contributor, Quizlet

10/2024 - Present

- Developing dynamic educational videos using Python as the core programming language and the Manim library for mathematical and conceptual animations.
- Collaborated with the content and engineering teams to translate learning scripts into animated visualizations, ensuring synchronization, clarity, and visual appeal.
- Applying Python scripting, animation logic, and creative visualization techniques, bridging the gap between education and technology through code-driven storytelling.

Metadata Manager, Quizlet

11/2022 - 10/2024

- Supervised and guided the metadata team.
- Planned strategies for the execution of the project.
- Completed other related projects as agreed upon by the Contractor and Client.

Metadata Moderator, Quizlet

09/2019 - 11/2022

- Supervised, assigned, and guided textbook metadata entry, duplication analysis, and quality-checking activities by the Client's team of Metadata Contributors as requested by the Client.
- Corrected metadata errors identified by the Client's content and/or metadata teams.

HR Executive, PwC Consultancies

10/2016 - 12/2016

IT Sales Coordinator, Tech Forte Systems

12/2014 - 12/2015

- Managed all the sales-related activities of the company.
- Handled a high volume of customer inquiries and provided a high quality service to each caller.
- Tracked sales orders to ensure they are scheduled and delivered on time.
- Ordering and ensuring the delivery of goods to customers.
- Supported the field sales team.

EDUCATION

B.Tech in Computer Science | Mahatma Gandhi University
